

MARKER, CHALK, AND TACKBOARDS 555 SERIES

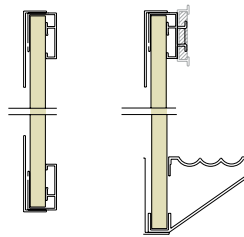

555 SERIES

Quality workmanship has always been a PolyVision standard. PolyVision offers an extensive selection of marker, chalk, and tack boards using various materials and finishes.

The 555 Series wide profile trim system consists of C-18, 1-1/2" extruded aluminum trim with a clear anodized finish (color powder-coating available as an option). The standard CR-55, 2-3/4" pen/chalk tray includes solid cast aluminum end closures. Aluminum framed boards come standard with wrapped and mitered safety corners. 1" display rail with cork insert is standard.

PolyVision developed *P³ceramicsteel™* surface for their markerboards and chalkboards. Dry erase markers and chalk glide easily across the surface with minimal friction, minimal wear, and maximum coverage. PolyVision is the only company that warrants its *P³ceramicsteel* surface forever, repairing or replacing the surface, for as long as it is in use.

Standard sizes are 4' x 4'; 4' x 6'; 4' x 8'; 4' x 10'; 4' x 12'. Custom sizes are available.

TACKBOARD

CHALK AND
MARKERBOARD

P³ceramicsteel SURFACE FEATURES

- SMOOTHER WRITING
- INCREASED COLOR CONTRAST
- REDUCED SURFACE LIGHT DISTORTION
- ENHANCED VISIBILITY
- OPTIMUM EYE COMFORT

6501U – BLACK

6502U – GREY

All designated colors are available and in stock. Please request samples to ensure color accuracy.

TACKBOARDS

PolyVision’s tackable surfaces allow presenters and educators to easily display illustrations and graphs. PolyVision offers cork, vinyl, and fabric surfaces.

Natural cork is composed of premium quality, pure grain natural cork.

Colored cork is composed of premium, linoleum-grade natural cork that is colored throughout.

Vinyls consist of a pliable, vinyl embossed surface, laminated to fiberboard or cork with a special adhesive.

Fabrics are 100% polyester 2-ply construction with a Class A flammability rating.
